

Wafer Pillow Packing Machine Wafer Biscuits Family Packer Horizontal Wrapping Machine JY-ZB400TL-3

Application: Suitable for multi stack package, such as wafer family, biscuit, chocolate etc.

Key Configurations

1. Equipped with two independent pushing in structure, the machine can simultaneously or alternately deliver two groups of wafer biscuits into the packaging process, significantly enhancing production efficiency.
2. Can be equipped with card feeder, make the package with paper tray
3. Suitable for packaging of multi-specification products (such as single pieces, multi-piece combinations or sandwich types)
4. Integrated with PLC servo motors and a touchscreen control panel, it allows rapid parameter adjustments (e.g., bag length, temperature) to accommodate different packaging specifications.
5. Multiple safety protection devices: Includes overload protection, emergency stop functions, and other safeguards to ensure operator safety.
6. Constructed with 304 stainless steel, offering corrosion resistance, easy cleaning, and compliance with food hygiene standards.

Technical Specifications

Model	JY-ZB400TL-3
Speed	50-400PPM
Total Powe	11KW
Weight	3500KG
Dimensions	5577×7607×1600mm
Compatible Products	Discs, spheres, squares, rectangles, ellipses, cylinders, etc.
Bag Length	45-1000mm
Voltage	220/380V 50Hz
