

DKX4540 Automatic Carton Opening And bottom sealing Machine

Suitable for carton sealing of the same specification at the same time; simple operation, convenient use, easy adjustment, fast unpacking speed, high efficiency, ruggedness, can be used stand-alone, and can also be used in conjunction with the packaging line after automation.

Automatic carton opening machine introduction

1. Suitable for carton sealing of the same specification at the same time; simple operation, convenient use, easy adjustment, fast unpacking speed, high efficiency, ruggedness, can be used stand-alone, and can also be used in conjunction with the packaging line after automation.
2. Applicable to various industries such as household appliances, textiles, food, daily necessities, pharmaceuticals, light industry, chemical industry, etc., and carton sealing;
3. Automatically open the box, automatically fold the lower lid, and automatically seal the bottom of the carton. The machine adopts PLC + human-machine interface control. The bottom is not stopped. The bottom and the bottom are completed during transportation; at the same time, the whole process of suction box, molding, bottom and bottom sealing;
4. Convenient operation, simple maintenance, stable performance, is indispensable assembly line equipment for automated scale production.

Technical Parameters

Model	DKX4540
Power supply	220V 50/60HZ
Power	240w
Table height	Min.H600 -650mm
Air source	>500L/min、 0.4~0.8Mpa
Tape	W48, 60, 75mm
Carton Size	L250~450mm/W150~400mm/H100~400mm
Speed	8-12 box/min
Dimension	L2000*W1900*H1450mm
Machine weight	NW-400kg GW-550kg
