

JS-09H Automatic Plastic Cup Sour Cream Cheese Yogurt Filling And Sealing Machine

The automatic liquid cup filling machine is suitable for filling and sealing materials such as jam, hummus, yogurt, peanut butter, ketchup, seasoning sauce, mayonnaise, barbecue sauce, hot pepper sauce, tartar sauce, condensed milk, honey, ice cream, jelly, etc.

Feature

1. The machine can automatically complete the processes of cup placement, metering, filling, film placement, sealing, spoon placement, capping, and finished product output.
2. The whole machine adopts a turntable design, which occupies a small area and is easy to clean and maintain.
3. Each working part is controlled by a cylinder separately, which effectively reduces the probability of error.
4. It is equipped with multiple sets of detection sensors to achieve no filling without cups and no sealing without films.
5. Adopting brand intelligent PLC control, the machine operates more stably and reliably.

Specification

Production Capacity	15-25 cups/min
Filling Range	30-300ml
Cup Diameter	50-120mm
Cup Height	40-130mm
Machine Size	1700(L)*10600(W)*1500(H) mm
Voltage	220V, 50/60HZ
Power	1.8Kw
Machine Weight	400KG
Air Pressure	0.6-0.8Mpa
