

SED-200-300PSY1-D Automatic Screen Printing Machine For Pharmaceutical Industry

The screen printing machine adopts advanced PLC control and digital operation of human-machine interface. The rotary cam splitter is precision driven, with high repeatability, precise positioning, fast speed, and good stability. This machine provides multiple functional settings to meet the perfect requirements of data-driven, standardized, and user-friendly homework. Innovative structural design, combined with a guiding system, operates quickly, stably and smoothly, with precise positioning, saving energy, automatic loading and unloading, saving labor, and ensuring printing quality.

Product Parameters

Machine Name	SED-200-300PSY1-D
Printing area	200x300mm
power supply	220v 50/60Hz
weight	350kg
Printing speed	1200 Pcs/H
capacity	2kw
