

## *Automatic strip packing machine DXD-350*

This machine suitable for the medicine and food industrial .It can pack tablet in the normal or special shapes, also capsule and the solid state product. It is small occupation, running stably, high capacity etc.

### **Features:**

Easy adjustment, safe and reliable operation, computer-controlled, easy to operate.

Good-sealing and anti-moist, to ensure the quality of medicine.

The machine adopts frequency to achieve infinite speed adjustment.

The machine is installed dual support on the front and back vertical plates, with sufficient rigidity to ensure every parts working stable and reliable with high-speed.

Suitable for printing and tear-off-lining.

With functions of automatic detection of mark, tracking adjustment automatically, to ensure double-side of sachet bag be marked completely and accurately.

In accordance with Chinese GMP standard.

1. The sealing area can attach to 350 mm.
2. The two rolls of material come forward together from two sides and hot sealing, The eye mark tracing system active and correct, conveniently adjustment.
3. The position of the across rupture position can be adjusted and controlled by the Differential through the left hand wheel .and the other parts are controlled by PLC automatically.
4. The length-ways sealing, across sealing, printing and the break mechanism are installed in the two vertical board, which is enough hard to assure the superior quality of each bag.
5. It is reasonal composing, small occupation, and perfect outlook.

**Main specification:**

Packing material	compound film made of plastic and aluminum and plastic
Width	380mm
Thickness	0.07-0.1
Inter diameter	Φ70-Φ76mm
Packing speed	across cutting max 55times/min
Installed power	3.5KW
Electrical source	three phase five lines AC 380V 50HZ
Outer sizes	1400×1200×1800mm
Weight	1100kg
