

Powder & granule high-speed packaging machine DC-338A2

Features:

DC-338A2 is the vertical sachets forming, filling and sealing machine for granules, powders, and pills, which adopts 2 step roller systems therefore to manage both 3 and 4 sides sealing. Functioned with PLC, it can adjust the size of the sachets as well as operation speed, thus makes your packing easier and more accurate. The color LCD touch screen can perform most of the settings with English instructions, realizing the user-friendliness and accuracy of the complete production. Filling, sealing, marking, bagging, and trimming, all done in one step.

There are 2 pairs of rollers in the machine. One for vertical heat sealing while the other cold seal. The vertical and horizontal sealing pattern introduces with dotted line as well as anti-leakage design, enabling neat and tidy appearances of the come-outs.

The products go inside the sachets via the optional weighing device, e.g., volumetric cup. Three different cutting blades, straight, saw tooth and dash line, upon requests. Notch cut function supports your sachets to be applied freely.

SPECIFICATIONS:

Width	Length	Speed	Volume	Electric power	Weight
40-85mm	40-120mm	30-120 pec/min	0.5-60g	3KW/ AC380V	450KG
	70-180mm				

Suitable material:

Seasoning, coffee and milk powder, medicine and pill, etc.
