

## ***CYCLONE - Automatic Ampoules Filling and Sealing Machine***

The Cyclone series was designed to give a solution for filling glass ampoules with liquids and sealing them by fusion using profane gas burner. This filling machine is based on a rotary platform and equipped with a diving filling nozzle for accurate and non dripping filling. It was designed to be capable of sustaining frequent washing. The Cyclone series is suitable for the food, cosmetics and pharmaceutical industries. It can be integrated with different workstations according to customer's needs and requirements.

<b>Model</b>	<b>CYCLONE 30</b>
Air Pressure	6 atm
Voltage	380V
Ampoules Feeder	Automatic
Thermal Sealing	Automatic
Automatic Nitrogen Injection	Optional
Coding Device	Optional
Automatic Labeling	Optional
Ampoules Collector	Automatic
Maximum Output	35 Ampoules/min
