

ZS3-J320B-YD110 Automatic LIQUID packing machine

Advantages:

Functions: It sets the Electrical and Mechanical in one, dual cup computer control system, the English show, that the adopt microcomputer control correction for electro-optical tracking systems, stepper motor equipped with high-precision, precision design of each bag of the same location. The control system achieves synchronous machine, fixed-length, location and speed, automatic fault diagnosis function. Can choose ribbon date printer or Seal playing device.

Performance: The mechanism automatic finish a series of action such as bags, filling, counting, sealing, slitting, the output of finished products. Steeples speed regulation, the process do not have downtime.

Scope of application:

Purposes: The machine auto dosing packing for paste, liquid and sauce such as tomato paste, hair cream, face cream, condiments, etc. to applicable to the local food, daily chemical and pharmaceutical industries.

Technical parameters:

Packing speed: 25-60 bags/min

Bag size: L30-280mm; W30-135mm (need replace bag format)

Packaging range : 25-110ml (need replace measuring cup)

Power: 1.2kw

Weight: 250kg

Dimensions: 650*850*2020mm

Packing form: three/four-side sealing
