

VCZ-A Automatic Inline Capping Machine

VCZ-A Automatic Inline Capping Machine is suitable for various material and figure Containers, Such as plastic bottles, glass bottles, and metal bottles. The max production speed can reach 6000 bottles/hour.

Features:

1. The machine is made of good type stainless steel, also applied to GMP standard requirement.
2. No caps will be dispatched if there is no bottle in the seat.
3. Don't need instead any components, just adjust the position of several components if we want to change different material or figure bottles and caps for tightening.
4. Sorter Selections machine, conveyor machine, cap tightening machine, bottle calming strap can be conversion adjusted to meet the tightening requirements for various bottles and caps.
5. Custom-tailoring diversified for special specification

Technical Parameter:

Current supply	AC 220 V;50HZ (or according to client voltage requirement)
Power	2.2Kw
Production speed	6000 bottle/hour
Container month size Range	Diameter: Φ 40mm- Φ 100mm
Suitable Cap size range	Diameter: Φ 20mm- Φ 50mm
Machine Weight	650kg
Machine Dimension (L×W×H)	2000mm × 850mm × 2050mm
