

## *ZTZXT01 Packing Machine*

### 1. Signal design:

Single structure design accord with the traditional installation of product line and it occupies small room.

### 2. Multi-function mould:

It can install many kinds of functional module Mainframe on the mainframe to satisfy various customers. Servo coding modular, certification modular, foreign nationality coding time modulate modular, PP strapping package module, heated molten sol modular.

### 3. High reliability, high performance price proportion:

It links with the self-motion product line and show excessive high moving stability, and it has competitive price.

### 4. Good quality and prefect service:

We are fully considerate of the reliability and maintenance of original devices and spare parts, fully represent the after sale service of time and good quality, it makes users feel comfortable.

### Technical Parameters:

Voltage	5KW 22V 50HZ
Apply to the cartons	L392XW293XH198
Feed speed	100 bags / min
Packing speed	5 cases / min
Packaging materials	Film bag
The compressed air	0.5-0.7MPA
