

GT-1000L Paste State Packing Machine

GT - 1000 liquid or semi-liquid packaging machine series, completely controlled by computer program, the production process can be done automatically, such as: bag making, measuring, filling, sealing, printing batch number, production date, and mouth, cut off or couplet body bags, counting, etc. The plunger pump volume metering, especially suitable for the packing drawing and dripping, and similar materials such as shampoo.

Adopt volumetric liquid filling system, used in miso soup, sauce, gels, grease and grease filling, such as bag, suitable for food, cosmetics, medicine and chemical industry. Various viscosity products even soft width of compound products can completely filling. Liquid packaging machine has the advantages of rapid, accurate, economic and practical.

Technical parameters:

Type	GT-1000L
Made bag length	100-550(mm) (custom made)
Made bag width	120-290(mm) (custom made)
Film Width	260-600(mm) (custom made)
Bale capacity	≤3L
Packing Speed	20-60(bag/min)
Machine Power	1.6(kw)
Gas source	0.65(mpa)
Air consumption	200(L/min)
Dimensions	900×2000×2040(mm)
Weight	750(kg)
