

PAY2000III

Electronic tablet and capsule counting machine(24 Channels)

Introduction:

PAY2000III counts tablets and capsule through 24 strips of channel, medicament can lay off passing three classes automatically. Falling medicine is uniform and counting tablets is precise, being suitable for all kinds of single bottle filling quantity and tablet type, changing variety without replacing any mould. It adopts the sensitive technology of the CCD and its rate of distinguish is high, the speed of response is fast and the operating is the stepless timing. It is very convenient to operate. It is controlled by PANASONIC programmable controller (PLC), and man machine interface conversation operating system. Adopting international name brand photo-electricity controlling system controlled when bottles are lacking and blocking then cease automatically, the operating is stability and reliable. Materials touching with medicine conform to requirements of GMP.

Main technical data:

Filled quantity: 30~5000grains/bottle

Speed: 80~100 bottles/min (when filled quantity is 60~50grains/bottle)

Net dimensions: 1200×1900×1800(mm)

(W×D×H)
