

Blister Packing Machine IPEC-A-44EXL

Blister packing machine is suitable for both the Cold Forming and thermo Forming blisters. The machine is suitable for large batches.

IPEC-A-44EXL Flat Forming Flat Sealing intermittent running, having Format area 230 x 140mm. The machine is suitable for large batches

Base Materials: PVC/PVC-PVDC/ACCLAR/TRIPLEX/PP/ALU-ALU (OPA).

Lading Material: Aluminum with Heat Sealable Lacquer Coating.

Salient Features of Blister Packing machine:

- Packing speed: 40Cycles/Min for Thermo-forming, 35Cycles/Min for Cold-forming
- Feeding system: Auto feeding system by PLC logic with Pneumatic Combination
- Servo Drive Indexing: Servo web indexing by rigid PLC logic
- Operator Interface: User friendly MMI Touch screen
- Pneumatic Operations: FESTO make fast responsive, Oil free, minimum wear and tear, easy maintenance and universal availability of brought out.
