

G82K High Speed Pillow Bag Granule&Powder Seal Pill Pouch Packaging Machine

It is suitable for packing products with granule or powder shape.

Features:

1. It is specially designed for automatic multi-line stick type powder or granule filling and packaging. Put the film roll to be used on the machine, the film would be split into lanes and made into long tubular bags, and products measurement, filling and packaging can be performed automatically.
2. The operation is simple and reliable, bag length and bag width can be easily adjusted. Optical control is precise. With skateboard type metering device, the filling volume of each lane is adjustable. The machine is suitable for mass production of bulk products.

Technical data:

Model	G82K
Product name	High Speed Pillow Bag Granule and Powder Packaging Machine with Multi-lanes
Bag type	Center sealing
Bag length	50~170mm
Bag width	11~65mm
Weighing system	Metering disc device / Skateboard type metering device
Qty. Of lines	2~12 lines (Metering disc device: 4 lanes; Skateboard type metering device: 2~12 lanes.)
Bag size	L:40~110mm, W:30~80mm
Packing speed	25~50bags/min;(the actual speed depends on the size of products, packing material,etc.)
Filling range	0.5~50cc (the filling range depends on the feeding device and product properties.)
Max. film width	350mm
Max. film roll diameter	Φ400mm
