

Small Cellophane Wrapping Machine Price CK-BZ200B

The playing cards cellophane wrapping machines have many specifications and different price. Our small cellophane wrapping machine used the international advanced system to ensure the smooth operation of the machine. The use of these systems makes the operation of the machine easier. When choosing the parts, we adopt international famous brands, which will ensure the quality of the machine.

Playing Card Wrapping Machine Features:

1. This machine is a kind of lengthened machine, which can be used to meet the packaging requirements of bulk cards required by some users.
2. Instantly sealed, the heat-sealing station does not store materials, and is similar to cold packaging, which has no effect for drugs and heat-sensitive products.
3. Fully automatic: automatic feeding, stacking, packaging, heat sealing, finishing, counting.
4. The electrical control system is centered on the programmable controller PLC to ensure stable and reliable operation of the equipment.
5. The small cellophane wrapping machine can pack different types (size, short, wide and narrow) of box packaging and solid moldings by replacing a small number of parts.

Playing Card Wrapping Machine Working Principle:

The BOPP film is driven by the film roll and feeds the film in turn. When the transparent film is sent to the cutter, the cutter cuts the film and the film stays on the cutter. When the push plate pushes the package forward, the inert film is pulled down and attached to the package, and the push plate continues to push the package and the transparent film.

When pushing the lower refractive plate, the push plate is withdrawn. When the second package touches the first package, the first package is advanced by the thrust of the push plate, and the corner is started. Then, relying on the thrust of the push plate, the package naturally produces a chamfer, and the left and right seals are hot, the upper shape is formed, and the lower shape is hot-sealed to complete the entire packaging action.

Model	CK-BZ200B
Packaging speed	30-80boxes/min
Packaging materials	BOPP
Length of packing size	50-160mm
Width of packing size	20-100mm
Height of packing size	10-50mm
Machine dimension	2800*790*1550mm
Machine weight	750kg
Power	4.5kw
Voltage	220V 50Hz
