

SUPER PHARMA

COMPACT, HIGH SPEED, VERSATILE

The SUPER PHARMA series shrink bundlers combine high speeds with pack versatility in a compact footprint with no change parts. This new system achieves faster speeds than previous models by using an overhead fly bar pusher system. The flight bars use fully adjustable plates which allow them to accommodate various product sizes and pack configurations. The film is sealed against a silicone belt, eliminating the need for a lower seal bar assembly. These machines achieve speeds of 80 bundles per minute.

POLYPACK'S SUPER PHARMA MACHINES integrate state of the art design, construction, operation and safety features. These machines are designed and built to specifically meet the needs of the pharmaceutical and nutraceutical industries. At less than 8 feet long, These machines are very compact and can multipack small bottles, vials and cartons of different shapes and sizes.

SUPER PHARMA

Curved Infeed Shown

SUPER PHARMA MACHINE FEATURES

- *Heavy Gauge, Stainless Steel Construction
- *No Change Parts
- *Fully Adjustable Flight Bar System
- *Self-Leveling, Teflon[®] Coated Hot Knife Sealbar Assembly
- *Silicone Sealing Belt
- *Side or Curved Infeed Options
- *Pre-Programmed Collation Modules
- *Self-Adjusting Solid Stainless Steel Rod Tunnel Conveyor (No Belts or Coatings)
- *Engineered as a Single Unit with Integrated Double Insulated Tunnel to Reduce Energy Consumption
- *Polycarbonate Enclosures Ensure Safety and Easy Access to Machine Components
