

Plastic Bottle Capping Machine

Characters:

1. The machine use the straight line into the bottle, automatically arrange caps, sleeping caps, caps after sleeve and check will go into the gland system by the clamping bel.
2. Due to the lid-cover flat belt design have a drop of slop, the caps after press will become more and more tightly.
3. The machine has simple structure, convenient adjustment, production speed fast, high pass rate, after cap pressing has good performance, suitable for cap pressing of foodstuff, soy sauce, vinegar, vegetable oil's bottle shape.

Machine Parameters:

Capacity	≤8000b/H
Applicable Bottle Diameter	40-110mm
Applicable Bottle Height	150-300mm
Cap Diameter	45-160mm
Air Pressure	0.6-0.8Mpa
Voltage	AC220/380V, 50/60Hz
Total Power	2.2Kw
Net Weight	850kg
Dimension	2000(L) × 930(W) × 2100(H)Mm
