

Automatic Box-opening Machine KW-KX550

The machine can automatically carry out the functions of carton unpacking, bottom flap folding, bottom tape sticking, output, etc., which is economical and efficient.

The operation must be completed in a stable state, and there must be sufficient reliable positioning and safeguard, and must not cause damage and damage to the carton.

Characteristics:

- Out of the box, smooth, beautiful, stable and reliable out of the box;
- The single-machine independent debugging and production control of the control panel interface, and has the number of production count, machine running speed and equipment failure, text display and prompts. And it has various safety protection functions such as fault alarm, fault shutdown and emergency shutdown;
- Carton size change can be easily and accurately adjusted by hand wheel.

Technical parameters:

Carton range	L max600-min200mm
	W max500-min150mm
	H max350-min100mm
Boxing capacity	720 pieces / hour max
Carton accumulation	100 pieces / hour corrugated box
Carton material	General specification corrugated paper
Using tape	OPP; kraft paper 38mm/50mm (width)
Carton size change	Handle adjustment about 1 minute
Power supply	Single phase 220V
Air source	0.5Mpa(5kg/m ³)
Air consumption	300L/min
Size	L2000 ×W1900×H1450mm
Weight	600kg
