

FL-10H 10 Heads Filling Machine

This machine is the gravity Filling Machine, specifically for the heavy bubble, no viscosity, without gas liquid filling.

Product description

1. This machine is the gravity Filling Machine, specifically for the heavy bubble, no viscosity, without gas liquid filling.
2. It can apply to different type bottles, different liquid to sub package automatically, it can apply to different container filling, can be switch specification in a short time, just need adjust the machine.
3. Adopt the PLC and the touch screen automation control, it can show us the production status, easy operate and maintain.
4. This machine is the suitable for packing the days of supplies which no of viscosity and the agrochemical products.

Machine features

1. PLC control and man-machine interface system (touch screen).
2. The machine has the advantages of novel design, beautiful appearance, friendly interface, strong adaptability, simple operation, accurate filling quantity, convenient maintenance and so on.
3. Using the world-famous brand of electrical and pneumatic components, low failure rate, reliable performance and long service life.
4. Filling volume and filling speed adjustment are simple, operated and displayed by touch screen.
5. With no bottle no filling function, liquid level automatic control feeding.
6. The bottle with different shapes and specifications can be quickly adjusted without changing parts.
7. Filling head with special leak proof device, filling without drawing, drip phenomenon.

Note: the range and speed of filling can be designed according to user's requirements.

Parameter:

Model	FL-10H
Filling range	100~1000ml
Filling speed	2000-3000bph
Measurement accuracy	±1%
Power, Voltage	2.2kw,380v
Heads	10(can be customized)
Air consumption	0.5-0.7Mpa
Net weight	700kg
Dimension	2400*1000*2300
