

## *Automatic Gel Labeling Machine*

Automatic gel paste labeling machine with intelligent control, automatic calibration without label and automatic label detection, to avoid wasting and missing labels;

### **Features of Automatic gel labeling machine:**

1. The adjustment is simple, there is no dead angle when switching between different bottle shapes, and the adjustment is simple and quick;
2. Using a star wheel separating mechanism to automatically separate bottles to improve stability;
3. Touch screen control, human-computer interaction, parameter modification are intuitive and clear, and various functions are easy to switch;
4. Intelligent control, automatic calibration without label and automatic label detection to avoid wasting labels and missing labels;
5. Mainly made of stainless steel and high-grade aluminum alloy, the quality is firm, and it meets the GMP production requirements;
6. Touch screen operation, parameter adjustment is simple and quick, and the operation is convenient;
7. With production counting function, parameter setting protection function, convenient production management;
8. Optional functions and components:
  - Hot coding/printing function;
  - Add labeling device;
  - Other functions (customized according to customer requirements).

**Technical parameters:**

Applicable label length:	20mm~285mm
Applicable label width (bottom paper width):	20mm~180mm
Applicable product diameter:	25mm~100mm
Applicable product height:	25mm~300mm
Applicable label roll outer diameter (mm):	φ280mm
Applicable label roll inner diameter (mm):	φ76mm
Labeling accuracy (mm):	±1mm
Labeling speed (pcs/min):	25~50pcs/min
Weight (kg):	About190kg
Frequency (HZ):	50HZ
Voltage (V):	220V
Power (W):	700W(Traction step)
Equipment dimensions (mm) (length×width×height):	About1950mm×1200mm×1500mm
