

## HLT-BB01 Single Color Cream Filling Machine

### Characteristics

1. Flow: Lay down bottles manually--filling automatically --put inner ring by hand- -press inner ring automatically--Mechanical arm take and put bottles on belt.
2. Large size color LCD touch screen interface, PLC automatic control system, frequency conversion, electrical components all adopt international brands. It is easy to operate and display directly.
3. Piston Pump driven by servo motor, high filling accuracy.
4. The machine covers a small area with high efficiency and low loss.
5. The filling nozzles customized according to the sample, there is no spare one. Any more nozzles or different ones require additional cost.

### Parameter:

| Type        | HLT-BB01   |
|-------------|--|
| Flow        | Lay down bottles manually--filling automatically --put inner ring by hand--press inner ring automatically--Mechanical arm take bottles and put down onto belt. |
| Speed       | Single color : 20-30PCS/min  |
| Mode size   | Customize in accordance with bottles   |
| Power       | 1Ph 220V / 2KW   |
| Pressure    | 0.6Mpa   |
| Measurement | L1120MM X W830MM X H1682MM   |
