

BS-400LA/BMD-450C Fully Automatic Heat Shrink Machine

Type: L-type fully enclosed, Fully automatic shrink wrapping machine, Automatic Shrink Machine, BMD-450C automatic shrinking machine, automatic shrink wrap machine.

Fully automatic heat shrinking machine (carbon steel) is suitable for single or collective packaging of products in industries such as pharmacy, foodstuff, beverage, stationery, printing, cosmetics, gifts, electronic products, toys, auto parts and tableware. Other application include brake pads, books and notes, cartons, tableware, and tapes. After the goods packaged, the appearance is more beautiful, the external film can also be dust-proof, moisture-proof and crash-proof, and make the articles easy to transport.

BS-400LA Technical parameter:

Sealing cut form	L-type fully enclosed
Voltage	380V / 50-60Hz / 3phase
Max. speed	35 bags / min
Packing height	≤125mm
Packaging width	≤350mm
Use film	POF on the folder
Package Size	Width + height ≤ 400mm; length + height ≤ 480mm
Max. film	530mm (width) × 280mm (outer diameter)
Total power	1.5kW
Platform height	780-850mm
Pressure	≤0.5MPa (5 bar)
Main material	Carbon steel
Total Weight	300kg
Sealing and cutting system	Constant temperature heating system, easy to replace the cutter, no smoking, no odor

BMD-450C Machine Main Parameter:

Furnace size	1200mm (L), 450 (W) × 220 (H) mm
Conveyor belt	Chain conveyor, roller sleeve silicone tube
Total power	7kW
Voltage	380V / 50-60Hz / 3phase
Convoing speed	Adjustable, 40meters/ min
Platform height	780-850mm
Main material	Carbon steel
