

HU-10BG Pump Cover Capping Machine

HU-10BG pump cover capping machine is integrated into the bottle, cover, cover, screw cap, and bottle out. It adopts automatic pump cover, automatically adjusts the direction of the pump cover, automatically covers the cover, and automatically caps. The degree of automation can be It is comparable to similar foreign products. The machine runs smoothly, has low noise, large use range and high capping rate. The surface is polished and beautiful. The production speed of the machine is adjustable, which is convenient for the production line. It is an ideal choice for all medium and large packaging workshops.

Technical Parameters:

- Mainframe dimensions: 2400mm (length) * 1950mm (width) * 2700mm (height)
- Container size: $\phi 40 \times 80$ mm to $\phi 100 \times 280$ mm; shaped bottle can be customized
- Inner plug specifications: $\phi 25$ mm to 40mm
- Pump cover height: 100mm to 250mm
- Power supply voltage: 380V; 50HZ
- Machine power: 4.5KW
- Number of caps: 10
- Production capacity: ≤ 7000 BPH bottles of the same height;
