

GTI-J150 Pharmaceutical High Efficiency Capsule Softgel Filling Machine

Our Soft gel making machine is designed to produce softgels from either animal gelatin or plant starch. We are an expert in the soft gel encapsulation machine manufacturing. All machines come in both standard and custom designs for various soft gelatin capsule filling needs in pharmaceutical, chemical and food processing industries. Softgels are very popular especially in the fast-growing nutraceutical industry, take this chance to skyrocket your business.

Advantage:

- * You can easily customize your custom Softgel capsule to fit your personal shape and size.
- * It has an increase in bioavailability.
- * You can fill different types of liquids, semi-liquids and suspensions.
- * You can easily swallow Softgel capsules without using water.
- * Softgel capsules have airtight seals that is not easy to tamper with thus making them safer.

Technical parameters:

Model	GTI-J150
Die Roller Speed	0-6 RPM (frequency control)
Die Roller Size	φ103*100mm
Single-piston Feed Rate	0-2ml
Production Capacity	30,000 caps/h (8#OVAL)
Load Difference	≤±2%
Filling Precision	±1%
Power Supply	380V, 50Hz
Motor Power	0.75kw
Total Power	5kw
Overall Size	1680*600*1550mm
Weight	550kg
