

GHD-220 Multi-function High-Speed Cartoning Machine

GHD-220 Multi-function Cartoning Machine is made of series of precision gear and device, all the work like drawing carton, opening carton, drawing specification, wrappage filling, batch number print and carton closing can be finished one time, completely in conformity with GMP.

World famous-brand electrical device was used on the machine parameter and any failure will be showed on the touch screen. All of this make the machine easy to operate.

Performance Advantage

1. The machine will stop and show the location when overload happened, those overload like conveyor belt overload, paper folding device overload, pushing hands overload.
2. In the packing process, warpage will have priority, without warpage the work like drawing specification, drawing carton, push wrappage will stop.
3. Two pushing hands were adopted, specification will be pushed first and then turn to wrappage, this will not break the carton and wrappage.

Main Technical Data

| Model | GHD-220 |
|--|---|
| Max output(carton/min) | 200 |
| Max Paper folding speed(piece/min) | 200 |
| (A)Noise | <75 dB |
| Air consumption | 1m ³ /hour(pressure0.5-0.9Mpa) |
| Carton requirement (g/m ²) | 300-350g/m ² |
| Size of carton (L×W×H/mm) | (80-170) ×(33-70) ×(15-60) |
| Size of specification(L×W/mm) | (130-180) ×(130-260) |
| Power | 380V 50HZ 5KW |
| Size L×W×H (mm) | 4300×1620×1900 |
| Net weight (kg) | 1800 |
| Re : No additional information noted if there are any changed caused by the technical development. | |
