

Plastic Bottle Washing Machine LM-SXP

Guangzhou Manufacture Double Line Bottle Washing Machine Positive up and down the bottles, intermittent flushing of the positioning, to ensure accurate high-pressure jet of water sprayed into the bottle and, with two water separator, circulating water tank, water pump, a tap water rinse, a pure water rinse, effect of variable frequency speed control, water control.

Technical Parameters:

Washing Heads	48pcs
Applied Bottle Range	30-300ml
Capacity	3000bottles/hour
Power	1.5KW/220V
Suitable Bottle Height	100-350mm
Suitable Bottle Diameter	20-90mm
Water Consumption	1.5CBM/hour
Working Pressure	0.2-0.4MPa
Machine Size	2700x670x1180mm
