

## *Aerosol Filling Machines Automatic Single Platform 2800A*

2800A aerosol filling machines is a small automatic aerosol filling assembly line, CE approved. It design two sets liquid filling machine, valve correct, sealing machine and two sets gas filling in a rotary table.

The aerosol filling machines line also can equipped with automatic bottle arrange machine, valve insert machine, nozzle presser, cap presser, packing table. The line will be more perfect. Except the conveyor belt in this production line use anti-explosion motor, the other power input of this production line is from compressed air, therefore safety is ensured.

### **Technical Parameters:**

Outline (L*W*H) (mm)	6800*1800*1900
Capacity (cans/hr)	1800-2800
Liquid fill (ml)	50-1000 (customizable)
Gas fill (ml)	20-500 (customizable)
Repeated filling accuracy	0.5%
Diameter of cans (mm)	35-65 (customizable)
Height of aerosol can (mm)	80-350 (customizable)
Valve (mm)	25.4 (1 inch)
Working pressure (MPa)	0.65-1
Max. gas consumption (m <sup>3</sup> /min)	3
