

## *BSL-1538A Labeling Shrink Machine*

The far-infrared shrink packaging machine adopts quartz far-infrared tube as heating source.

This product adopts infrared radiation in direct heating of PVC/POP Shrinking membrane to achieve optimal contraction packaging. This system is made reliably by electronic stepless shift and booster in temperature control, which is applied in contraction packaging for food, beverage, candies, stationery, hardware tools, daily commodities and chemical product.

### **Technical Data:**

<b>Model</b>	<b>BSL-1538A</b>
Power	5KW220V50Hz
Feeding speed	0-10m/min
Feeding weight	15kg
Workroom size	800*150*380mm
Weight	50kgs
External size	800*450*1550mm
FILM	POF,PVC,PP
