

## QGF Series Bucket Filling Production Line

QGF series Barreled Production Line is composed of bottle washing~ machine, bottle filling machine and sealing machine into one body especially for the production of drinking water of 3 and 5 gallons. It is an ideal filling line to produce mineral water, distilled water and purified water. The whole line is made of superior stainless steel, anticorrosive and easy to clean. Sidemen's electric components are adopted as main components. The world famous product of AirTAC and Omron are introduced in the air circuit systems. The machine is compactly conformed to small occupation of land and high efficiency and reliable and stable quality and high automation. Only two operators are needed for alien, which is wholly automatic barreled equipment with motor, electric unit and air three in.

### Bucket washing filling and capping line

Number of filling positions	2
Filling volume:	3gallon, 5gallon
Barrel Sizes:	230×420, 276×490
Production capacity	60-240bucket/hr 380V, 50HZ
Power	total power 3.68kw
Air Source	pressure0.45-0.6Mpa, air consumption0.17-0.22m3/hr
Shape Size	3950×1600×1860 (L×W×H)
Overall dimensions	about 0.8T
