

High Speed Anti - Crushing Granule Bag Filling and Packing Machine

Pharmaceutical, food, daily chemical, agricultural, hardware, building materials and other industries, but also according to customer requirements to provide customized machinery.

Technical features:

The machine integrates bag-making, filling, sealing, printing, punching and counting, adopts double-servo motor to pull film, and has the function of automatic deviation correction. The cutting piece can be made in one of three ways: flat knife, serrated tooth and dotted line. The control components are all international famous brand products with reliable performance. The servo motor can also be used for horizontal seal, and the operation is stable and reliable. The patented anti-breakage technology is widely applicable to the quick-frozen food industry, which is very convenient for adjustment, operation and maintenance during use. The packaging machine for continuous packaging, pull film uninterrupted, achieve continuous pull film, greatly improve the speed of packaging.

Technical parameter:

Range	500-1500g
Materiel	Granule
Model	full-automatic
Speed	50-120bag/min
Form	in bag
Products	Frozen dumplings, frozen meatballs, frozen food
