

Auto Sleeve Sealing and Shrinking Packager ST1260

ST1260 supplies counting, full-column automatic shrink without tray, suitable for various of various of bottles and bottled drinks and provides single or double row of the bottle without bottom-tray. it is full-column shrinking packing ST1260. it is pilling, wrapping sealing shrinking cooling automatically. the whole producing process adopts the Germany advanced technology based on European standard. the electrical units are chosen from international famous companies, such as: OMRON, SICK, NAIS, MITSUBISHI and so on. the packed goods is neatness, compact, suitable for long transportation.

Scope of Application:

Suitable for big size products such as wooden sheet, door, ABS plastic board. Applicable to PVC and PE shrinking film.

Technical Parameters:

Model	ST1260
Conveyor belt length and width	4000mm*650mm
Packing size/tunnel size	1200*600*600mm
Packing speed	6-10packs/min
Voltage	220V/50HZ
Power	2kw
Sealing time/shrinking time/temperature	0.5-1.5s/0-0.6s/0-250°C
Film width/thickness	4000*1800*1230mm
Weight	1000kgs
Air pressure	4-8Mpa
