

Flow Type High Speed Candy Packing Machine (JY-ZB1200)

Horizontal Pillow Type Candy Packing Machine is mainly used to packing mini-candy, like hard candy, soft candy, gummy candy, double pcs chewing gum, segues, and similar products etc.

Advantage:

This machine is mainly serving for the confectionary and food producers. It can connect directly with the distributing line from candy production line to our candy packing machine.

It adopts the disc feeding. It's compact structure and easy to change the mold for different shapes candy.

A quick change of product dimensions is possible by exchange of the wrapping units.

Principal:

The first step is to install the packing film, through the motor, the film will be pulled down, and the paper sensor transfers the signal. The film will be formed, vertical sealing, horizontal sealing and then be cut down.

Applicable area:

Confectionery factory, food factory, commodity factory, etc.
