

Water Filling (Gallon) Machine QGF-900

Full automatic 5 gallon barreled water filling machine. The 5 gallon water filling machine supplied by taire machinery. It runs automatic by advanced MITSUBISHI PLC controller. The machine made of sst304 equips Nanfang pump

Product Description:

- This type machine is mainly used in filling & packing pure water, mineral water, beverage, wine, no contains gas liquid etc, it is suitable for 3gallon-5gallon barrels.
- The 3gallon&5gallon barrels with gland capping way, it is thermal shrink.
- The machine contains Flushing, Filling and Capping three functions together in one.
- It runs automatic by advanced MITSUBISHI PLC controller.
- The conveyor runs by frequency changer, it synchronous with the host inverter makes bottle feeding more stable and reliable.
- Reliable photoelectric detection, high-efficiency fully automatic production, simple operation.

Main parameter:

Model	QGF-900
Capacity	900b/h
Filling heads	6
Suitable barrel	3-5 gallon
Filling Pressure	0.2-0.3Mpa
Gas consumption(m3/min)	1.5
Filling Temperature	2-6°C
Gas pressure	0.6MPa
Power	6.25kw
Voltage	380VAC 50/60Hz
Outline dimension	5400*2600*2100
Total Weight	3500kg
