

TGB-500 High Speed Sleeving And Shrinking Machine

The machine can operate at the same limited velocity and there is no Bottle overturning or label missing.

It has super powerful servo electrical appliance configuration, motor encoder for servo motor conveying with high disposition, automatic trace with electric eye and whole line automatic stemless speed adjustment.

Electrical Appliance Configuration Specification:

The electrical appliance adopted by this type of trapping label machine are all import configuration, besides, it adopts the high-velocity positioning module, imported servo motor, servo driver, servo controller and fully-automatic adjustment well as humankind operation.

Variety Types of Casting Label:

The velocity of this type machine reaches within 500 Bottle per minute; it applies to such food&beverage industry as fruit juice, tea drink, dairy products, pure water condiments, beer and sports drink, etc of all kinds of Bottles types, It not only has a highly precise position for casting label, but also can stand out the perfect shape of the Bottle after shrinkage.

主要技术参数 Main Technical parameters

输入功率: Input Power:	4.0KW
输入电压: Input Voltage:	3, 380/220VAC
生产效率: Production Efficiency:	500瓶/分钟(Bottle/min)
主机尺寸: Size of Host Machine:	2500L*1200W*2200H
使用瓶身直径: Applicable Diameter of Bottle Body:	Φ28mm-Φ125mm
适用标签长度: Applicable Length of Label:	30mm-250mm
使用标签厚度: Applicable Thickness of Label:	0.03mm-0.13mm
适用纸管内径:	5" ~10" 自由调整
Applicable Internal Diameter of Paper Tube:	5" ~10" adjust it at will.
