

## Labeling Machine for 5 Gallon Cap KP-1300

The machine apply to 5 Gallon cap labeling and sealing, it's suitable for 5gallon cap manufacture and water factory.

### Features

- 1). Procedures: capping by hand, filling and feeding, cutting film and heat sealing, automatic cap outputting.
- 2).The machine adopts to PLC controlling system and sprue puller tracing by electric eye, In order to guarantee accurate positing, stable features, simple and easy operation; operator can manage the machine very well without training.
- 3). Advantages of anti-fake heat sealing film:
  - a) One-off opening has the function to anti-fake, it can't be recovered once open;
  - b) It adopts fully automatic heating and sealing crafts without glue and hand touch, so it can avoid the pollution;
  - c) The sealing protection system ensures the dustproof and germproof.

### Parameter Date

|                      |                   |
|----------------------|-------------------|
| Speed:               | 1300 pcs per hour |
| Voltage:             | 220v, 310w, 50hz  |
| Dimension:           | 700x400x1200mm    |
| Max Air Consumption: | 0.15cbm/min       |
| Weight:              | 240Kgs            |
