

PZB-600E Automatic High Speed Pillow Packing Machine

The machine is mainly applied to the packaging of biscuit, betel nut, snowy biscuit, snowy ice-lolly, yolk pie, instant noodles, chocolate, candy, western snacks, tableware for aerial food, transparent soap, hotel articles, wet tower, gauze mask, IC card, cartoon card, electric components, trademark, little hardware etc.

Block-shaped things in the industries such as food, daily chemistry, cosmetics, hardware, electronics etc. It has the function of anti-moisture, dust proof and photo negative, and also enhances the product level and additional value.

It can save more than 20% cost than using the manual packaging, and it can combine the aluminum plastic packaging machine and thermal contraction-packaging machine to manufacture.

Feature:

1. Dual frequency converter control, bag length can be set and cut precisely, saving time and film.
2. Imported touch screen, easy setting value of machine.
3. PLC controller system and touch screen display.
4. Fault detecting, which is shown on the screen.
5. Import brand photoelectric sensor track color mark high sensitive. No need to set the length of bag, intelligent cutting length.
6. Side sealing by hob, much higher speed.
7. PID digital temperature controller for perfect wrapping.
8. The conveyor is stainless steel to meet food safety.

Technical Data:

Type	PZB-600E
Film roll width	600mm
Film roll diameter	380mm
Packaged length	120-380mm
Packaged width	30-230mm
Packaged height	≤80mm
Production capacity	5-150bag/min
Electric supply	220V, 60HZ, 1Φ
Power	3.0kW
Machine dimension (mm)	4200*1000*1580
Machine weight	750KG
