

Cup Sealer Automatic Filling Machine CP-4R

Feature

- It is applicable for packing sauce or condiments.
- As for sealing pressure, the powerful air cylinder, Double System, has been adopted.
- Sealing is done twice and attachment/detachment of a sealing bar can be done with ease for it is a rail type.
- As the operation unit and the electric box are in the upper part of the machine, water cleaning is possible.
- Mold transport can be done in Steps and the water won't overflow even if it fills up a container.
- For accurate sealing, the seal bar has a 360-degree cushion.
- Each unit holds independent functions and has been minimized in mechanical defects.
- A flashing light is turned on 2 minutes before the film is finished. When the films are completely consumed, the machine will stop at its designated position.

Contents

Sauce, red pepper paste, soybean paste, jam, cream, other relevant foods

Packing material

AL+PE, OPP+PE, NY+PE, Other relevant packing papers with 3 sides sealed available for thermal sealing

Specification

Packing row	4 Row
Capacity	80~120 EA/min (on 4 row)
Date printer	Jet Printer & Others Date Printer Option
Packing size	W : 20~150 ×L : 20~200mm (option)
Filling capacity	20~200g (option)
Electric Power	220/380V, 3P, 50/60Hz
Compressed Air	5~7kgf/cm ² , 500ℓ/min
