

PSL-Series Water Bottle Hot Glue Labeling Machine

PACKSOUL PSL series automatic labelling machine is specially for attaching opp and bopp labels to round and cylindrical containers of water, beverage, wet tissue and daily chemical product.

Made entirely of SUS304, PACKSOUL labelling machine is solid and strong and based on an advanced technology, achieving a high output. PSL series labelling machine own 3000-12000 bph capacity for 500ml container. Of course, product always different. From this point, it's necessary to customize machine for specific products.

1. Roller gluing, it is glued on the head and tail of the label which decrease the dosage of the glue and makes the glue marks in equality and nice appearance.
2. With screw and star-wheel carrying containers firmly while dispensing, providing stable dispensing performance under high-speed operation.
3. Adopting PLC control system, frequency conversion for high accuracy, liability and stability of speed conversion.
