

Chocolate Coating Pan Machine PGJ 800 / 1000 / 1250

PGJ Series chocolate polishing machine is used to polish chocolate in various shape such as round, oblate, oval, melon seeds and columnar shape.

During the primary phase of the coating process, this helps increase the rate at which chocolate builds up on the product, and during the second & final stages, it helps smooth and polish the product.

Tablet pill film sugar coating pan: used to coating sugar on nuts, peanuts, pill, tablet, popcorn, and also oil, salt flavor.

Automatic peanut coating machine: used to coating chocolate on nuts, almond, cashew nuts, peanuts, coffee beans, and after coating, it can polish the coated nuts, shining it very well.

Technical Parameters:

Model	PGJ 800	PGJ 1000	PGJ 1250
Polishing pot diameter(mm)	800	1000	1250
Rotating speed(rpm)	28		
Main motor power(kw)	1.5	1.5	2.2
Air blower power(w)	250	250	370
Heating power(w)	1000x2		
Capacity(kg/time)	30-50	50-70	90-150
Outside dimensions(mm)	925*900*1500	1100*1100*1600	1340*1250*1680
Weight(kg)	230	250	400
