

Automatic Can Sealing Machine

The automatic can sealing machine is suitable for sealing various various tin cans, aluminum alloy cans, paper cans, etc.

Features

1. When the can body enters, the can lid is allocated accordingly. Without cans, there would be no lids.
2. The design of the operation panel is reasonable and simple, with PLC microcomputer control and touch screen man-machine interface.
3. High production capacity and high degree of automation, suitable for canning production line equipment.

Technical Parameter:

Name	Automatic can sealing machine
Voltage	220V 50Hz
Power	1.1KW
Can height	50-200mm adjustable
Can diameter	35-130mm
Production capacity	10-35/min
Size	3000*900*1800mm
Weight	500kg
