

## ***BSP6040TL Film Shrink Wrapping Machine***

The heat shrink packaging machine can reduce the possibility of the product being dismantled and stolen. When the shrink film shrinks, it produces a certain tension, so it can wrap a group of items to be packed tightly and play the role of strapping. Especially suitable for the collection of multiple items and pallet packaging.

The extended jet heat shrink packaging machine can be applied to PVC, Shrink packaging of shrink film such as POF and PP. Especially suitable for shrink packaging of POF shrink film.

### **Parameter:**

<b>Model</b>	<b>BSP6040TL</b>
Voltage	380v 50-60HZ
Power	21.6KW
Shrinking furnace size	1800x600x400mm
Single Product size	400(W)*300(H)
Conveying speed	0-15m/min
Raw material of conveyor	Teflon net
Conveying load	50kg max
Machine size	2500x900x1650mm
Weight	470kg
Applicable shrink film	PE.POF.PVC.PP
