

ZK-400S/500S/600S Double Chamber Vacuum Packaging Machine

The dual-chamber vacuum packaging utilizes a vacuum cover to alternately work on two vacuum chambers, so as to achieve the purpose of improving work efficiency. When one vacuum chamber is evacuating, the other vacuum chamber can place the packaging; it is suitable for the product packaging of large-scale production enterprises. When working, just press the vacuum chamber cover to complete the vacuum according to the set procedure. The whole process of sealing, cooling and exhausting. The vacuum-packed articles can prevent oxidation, mildew, moth-eaten, damp, and extend the product storage period. Mainly suitable for food, electronic products, chemical products, metal hardware and other hardware products.

Technical Parameter

Machine model	ZK-400S / ZK-500S / ZK-600S
Vacuum chamber size	440*420*80
Power supply / power	380V 50Hz 1.5Kw
Sealing size	400mm*10mm*4
Packing speed	2-4 times / minute
Machine size	L 980 *W 600 *H 950mm 150KG
