

PADF-400H Automatic 4 Heads Filling Machine

Features:

1. This machine adopts servo motor drive, PLC and touch screen control, 316L high precision gear pump filling principle, suitable for daily chemical, food, grease and other kinds of fluid and semi fluid material filling
2. Filling volume through the touch screen adjustment, filling volume is infinite, easy to dismantle the pump head & easy to clean, very suitable for the user who has many kinds of products, need to regulate the filling scope all the time.
3. High filling accuracy can achieve less than 0.5ml accuracy.
4. Can set two-speed filling(first faster and last slower), effectively prevent the bubble.
5. Through the touch screen one key to realize the gear pump operation direction Switching, can choose the pneumatic drip filling
6. Nozzle and hopper, ensuring high and low viscosity materials filling.

Technical Specification:

Model	PADF-400H
Suitable products	Liquid/Oil/Cream/Lotion/Shampoo
Filling Volume	10ml-unlimited
Filling Speed	25-45 bottles per minute,
Power	7.5kw
Air	0.4-0.6 Mpa
Voltage	220/110V 50HZ single phase/three phases
Weight	200KGS
Dimension	2400*800*1300mm(L*W*H)
