

Double Sided Adhesive Labeling Machine

This equipment can stick single side of round bottle, single side and double side of square bottle, single side and double side of flat bottle (such as pesticide, daily chemical, washing chemical, food, etc.). Wide range of application, strong adaptability. Dynamic synchronous tension control supply label, stable supply, fast, ensure the speed of labeling and labeling accuracy. The bottle dividing mechanism USES stepless speed regulation and can set the spacing of bottles arbitrarily. The calibration mechanism USES a synchronous chain to ensure the stability and accuracy of the calibration. The pressing mechanism is adjusted by screw, with precise action and wide adjustment range, which can be used for many kinds of bottles. Label synchronous positioning mechanism, label positioning error plus or minus 1mm. Man-machine interface operating system, any exception can be displayed and guide troubleshooting, simple operation. Comply with GMP requirements.

Technical Parameters:

1. Suitable type: Square bottle, flat bottle, bucket, shaped bottle
2. Suitable label highly: width: 40-220mm(No more than 220mm)
3. Speed: ≤ 4800 A / h (Depending on bottle size and label length)
4. Voltage : 220V, 50z
5. Power: 3.5KW
6. Dimensions: 3000*1500*1670mm
