

## *SN-2A Automatic Egg Milk Sugar Powder Filling Machine*

This equipment is the latest filling machine developed by our company in accordance with the latest GMP standards adopted in the country. The machine adopts the latest technology, and its design is more reasonable, more concise and more reliable. Automatically enters the tank, dispenses, fills, suitable for packaging powder granular materials such as milk powder, protein powder, chicken powder, solid drinks, grape puree, rice flour, etc.

### **Main characteristics:**

- Aluminum stainless steel structure, side opening combination hopper, safer and healthier, easy to open and clean.
- Servo driven screw. PLC and touch screen ensure easy operation.
- Weight feedback and proportion tracking eliminate the disadvantage of varying packaging weights across varying ratios of different materials.
- Save parameters of different flange weights for different materials, save 10 sets max.
- Replacement of auger parts, it is suitable for materials from ultra-fine powder to granules.

**Technical Parameters:**

Power supply	380/220V 50/60Hz 1.5Kw
Fill range	10-500g
Filling Accuracy	<1% (according to the powder material)
Filling speed	12-25bottles/min (720-1500 bottles/hour)
Dimensions	2440*700*1770mm
Weight	240kg
