

Automatic Jelly Glue Sachet Packing Machine DTVIP-5

This sauce stuffing liquid packing machine is suitable for packing various liquid and viscous food, medicines and chemical products and so on. Such as fruit salad, tomato sauce, honey, edible oil, seasoning, vegetable juice, lotus seed paste, sweet bean sauce and so on. And at the same time, this non food category products can be packed as well, like cream, cleaning agent, lubricating oil, industrial paste and so on.

Main Features

- All stainless steel structure, so it is very durable and can be ensure hygiene
- Simple operation type, easy to operate, so don't need to hire professional and technical personnel.
- Imported PLC control, user-friendly interface, greatly improve the control accuracy, reliability, intelligence and adjustment range
- Equipped with Level sensor monitoring, easy to adjust the length of bag
- Photoelectric switch automatic tracking of color film so that it can keep the consistent with the speed of the pump to ensure accuracy
- Bilateral tension membrane more quickly and stable and less friction
- Adopted Various imported high-quality components so that ensure the equipment's high quality and high performance.
- Don't need additional ejector or vacuum pumping device, it can be produced without air.

Technical Parameters:

Model	DTVIP-5
Filling Capacity	1 liters - 5 liters
Packing Speed	5-40 bag / min
Film width	350mm-520mm
Bag width	160mm-250mm
Film coil diameter	300mm
Film thickness	65 microns -100 microns
Packaging film	all kinds of heat sealing compound film
Power	2.5KW
Voltage	415V/50Hz /3phase
Gas consumption	3MPA
Machine Weight	700KG
Product packaging specifications	1580*1380*1990 (mm)
