

Vacuum Can Seamer Sealer DH-FK-502

Main features

1. This equipment is suitable for all kinds of round opening tins cans, aluminum cans, plastic cans, paper cans packaged products, first vacuum then nitrogen, and finally sealed. Effectively extend the product shelf life, ideal for food, beverage, pharmaceutical and other industries.
2. Automated control and operation to improve production efficiency and save labor costs
3. The can lid joint control device, when the can body enters, the corresponding cover is provided, if there is no can, there is no cover.
4. Can body does not rotate during the sealing process, which is safe and stable, especially suitable for fragile and liquid products.
5. The seaming rollers and chuck are processed by Cr12 die steel, which is durable and high tightness.
6. The residual oxygen content is less than 3%, effectively extending the shelf life of the product and improving product quality.

Main Technical Data:

Model	DH-FK-502
Speed	13-14 cans/min
Remaining oxygen	≤3%
Can size	φ73—φ131mm/H100-190mm
Power supply	3Phase 208-415V 50/60Hz
Total power	9.1kw (Include Vacuum pump 3kw)
Air supply	6kg/cm 0.25cbm/min
Need Nitrogen	10cbm/hour/set
Nitrogen	Purity >99.99%, Pressure:0.4Mpa
Overall dimension	1400*1000*1894mm
Total weight	800kg
