

DXDC8IV Automatic Tea Bag Packing Machine For With String And Tag

DXDC8IV model tea bag packing machine is new developed, with thermal sealing and multi-functions, it's the necessary for bag-type drinking's automatic packing.

With the innovated external packing method, the bag shape is beautiful. The transmission system is controlled by the variable frequency, the intermediate plate-type thermal sealing is adopted for the outside bag, and the cartoning is automatic.

The machine can be used for the thermal sealing for many kinds of films, including paper/plastic, plastic/plastic, plastic/Alu/plastic/ and paper/Alu/ plastic, etc.

Application:

Heath care tea, antihypertensive tea, liver protecting tea, beauty tea and slimming tea

Technical Parameters:

Packing speed	105±5 bags/min
Width of inner bag's filtering paper	125mm
Packing volume	6cm ³
Inner bag size (L×W)	62.5 mm×50 mm
Outside bag size (L×W)	70 mm×80 mm
Label size (L×W)	24mm×26mm(Thermal-sealing label)
	24 mm×28 mm (Thermal-sealing label for tear open)
Length of label wire	210mm
Material of outside bag	Many kinds of compounding material can be used for the outside, including BOPP20/ VM-PET12/ PE40, paper/ PE, matting OPP20/ BOPP35, etc
Power supply	AC 220V/380V
Power	2.5KW
Dimension (L×W×H)	1840mm×1290mm×1890mm (Standard configuration)
