

YB-LP1 Automatic Bottle Unscrambler Machine for PET Plastic Round Bottles

Application: the machine is mainly used for automatic arrangement and arrangement of various plastic bottles (round bottles and flat bottles). It is widely used in food, daily necessities, health care products and pharmaceutical industries.

Performance features:

1. PLC control system, color touch screen display (optional).
2. It has the advantages of high speed, stable performance, high qualified rate and low labor cost.
3. It is easy to operate and master.
4. It has the function of automatic shutdown when full bottle and automatic start-up in case of lack of bottle.
5. The shell of the machine is made of stainless steel, which fully conforms to GMP standard.

Technical parameters:

Model	YB-LP1	YB-LP2
Unscrambling speed	40-100 bottles/min	40-100 bottles/min
	Depends on bottle shape and size)	Depends on bottle shape and size)
Power	0.3 KW	0.5 KW
Power supply	1Ph. 220V, 50/60Hz	1Ph. 220V, 50/60Hz
Net weight	120kg	280kg
Overall dimension	L1500 × W1100 × H1200mm	L1800 × W1300 × H1300mm
