

Cereal Bar Making Machine HTL-608

The production line is a fully automatic complete plant for Cereal bar, Energy bars, nut bars, peanut candy bars, sesame candy bars and other cut and shaped foods.

Features:

1. The three and one processes of mixing and cutting are integrated, and there is no need for manual and automatic operation. The production efficiency is improved and the labor cost is greatly saved.
2. Imitating the principle of manual cutting and adopting scientific frequency conversion speed regulation, it can meet your different product needs.
3. There is multiple leveling structure, which is pressed flat and uniform in thickness. Automatic control of cutting speed, automatic feeding, horizontal and vertical automatic feeding to cut food, and the size of the box can be customized.
4. PLC intelligent computer control, convenient and fast, easy to operate.
5. The continuous operation of the cutter can reach 2000 pieces per minute, greatly improving the production efficiency.
6. The length of the cross cutting high-speed head can be adjusted freely without length and inclination.
7. The paving is uniform, and the unequal distance auger is used to make the whole paving uniform.
8. Flattening, bright surface, convenient thickness adjustment.
9. The material of the whole equipment is practical and the design is reasonable.

Technical Parmeters:

Model	HTL-608
Capacity	400*candy width*cut
Output	400*candy width*cut
Material	Stainless steel
Voltage	380V/50Hz
Power	6kw
Effective width	400mm
Range of product	L=0-100mm/100-200mm
Dimension	9800*1000*1300mm
Weight	2000kg
